

**Supplementary Table S2.** Subgroups analysis

Variable	Pooled proportion (95% CI, %)	No. of studies	p-value	Heterogeneity testing			Model
				I-squared	p-value	Tau-squared	
TAC in CAD	0.476 (0.365–0.590)	17	0.684	96.36	<.001	0.866	Random effect
Aortic arch	0.404 (0.184–0.670)	3	0.486	99.137	<.001	1.580	Random effect
Aortic root	0.510 (0.282–0.733)	4	0.938	80.248	<.001	0.223	Random effect
Ascending aorta	0.344 (0.117–0.673)	2	0.355	0.000	.91	0.000	Random effect
Descending aorta	0.534 (0.341–0.718)	6	0.736	90.474	<.001	0.509	Random effect

Pooled proportion of thoracic aortic calcification in respect of aortic segment involved in patient with coronary artery disease.

CI, confidence interval; TAC, thoracic aorta; CAD, coronary artery disease.
